## Bio-6-Plus™

The pancreas possesses two major secretory glands, and consequently possesses dual functions, that of an exocrine and an endocrine gland. As an exocrine gland it serves to secrete the major digestive enzymes amylase, protease and lipase, which function to digest starches, proteins, and fats, respectively. In addition to these, the pancreas also secretes trypsin, chymotrypsin and carboxypeptidase.

Exocrine insufficiency is characterized by deficiency or absence of these three major pancreatic digestive enzymes. Deficiencies in one or all three of these enzymes prevent the normal break down and absorption of food, leading to maldigestion and nutrient malabsorption. The classic clinical manifestations of exocrine insufficiency are malnutrition, abdominal cramps, and steatorrhea. Additionally, pancreatic enzyme deficiency has been associated with an increased risk of intestinal infection. Adults with pancreatitis or other pancreatic deficiencies may present with weight loss, anorexia, greasy, bulky or foul-smelling stools (due to steatorrhea), abdominal distention, and flatus (gas). Supplementation in individuals with pancreatic exocrine deficiency or insufficiency may serve to achieve a normal nutritional status. Because of its digestive nature, **Bio-6-Plus™** may also act as a beneficial aide in the thinning of mucous. In a published randomized, double-blind, placebo-controlled trial with patient's diagnosed with chronic pancreatitis, significant efficacy was demonstrated with enzyme preparations in reducing fat excretion, decreasing stool frequency and improving stool consistency.

**Bio-6-Plus™** supplies porcine derived raw pancreas concentrate, which provides 50,000 NF units of amylase, 9,300 NF units of lipase and 50,000 NF units of protease. It also supplies Superoxide Dismutase and Catalase from Biotics Research's own proprietary tableting base.

Supplement Facts		
Serving Size: 1 Tablet		
	Amount Per Serving	Amount Per Serving
Raw Pancreas Concentrate (porcine)	250 mg	*
Superoxide Dismutase (from vegetable culture †)	10 mcg	*
Catalase (from vegetable culture †)	10 mcg	*

\* Daily Value not established

**Other ingredients:** Cellulose, stearic acid (vegetable source), modified cellulose gum, food glaze and magnesium stearate (vegetable source).

Each tablet supplies Amylase (50,000 NF Units), Lipase (9,300 NF Units) and Protease (50,000 NF Units) from Raw Pancreas Concentrate.

† Specially grown, biologically active vegetable culture containing naturally associated phytochemicals including polyphenolic compounds with SOD and catalase, dehydrated at low temperature to preserve associated enzyme factors

This product is gluten and dairy free.

**RECOMMENDATION:** One (1) tablet three (3) times each day as a dietary supplement or as otherwise directed by a healthcare professional.

**KEEP OUT OF REACH OF CHILDREN**

Store in a cool, dry area.  
Sealed with an imprinted safety seal for your protection.

Product # 1199 Rev. 07/13
